How to post a reply to an existing thread

You first need to find the thread into which you wish to post a reply.

There are two ways to do this.

Method 1: thread appears on main window. If the thread you want is highlighted on the main TP window, simply click on the name of the thread and the thread will open.

Method 2: select the thread from the list in the area itself

First select the area and the list of topics will appear. Press the name of the one you wish to reply to.

Don`t know what to do (10 1 2) jeanierec
